ACRYLIC FABRICS

WATERPROOF FABRICS

PLAIN FABRICS

Composition: Acrylic 100 %, solution dyed Acryl 100%, spinndüsengefärbt Acrylique 100 % teint masse
Finishing: Teflon - Cleangard
Weight (g/m ²): ≈ 300
Width: 120 cm
Colour fastness: 7-8/8
Oil repellency: Note: 4-5
Water repellency: ≈ 310 mm
Tensile strength (daN/5cm) Warp/Weft: 150 daN/ 95 daN
Tear resistance (daN) Warp/Weft: 3,5 daN / 3 daN

Acrylic fabrics guarantee the highest quality of the product, providing thermal comfort and protection against UV radiation. Made 100% out of acrylic fibre, dyed in chemical solution, provide excellent protection against colour loss. UV resistance coefficient is 7-8 at 8° scale. Impregnation with use of TEFLON® or SCOTCHGARD® agents provides an excellent protective barrier and strengthens water-repellent qualities of the fabric, also preventing dirt adhering. Resistance to leaking: 330 mm water column. The advantage of acrylic fabric is also high resistance to tensile and tear. Permeability to air and water repellency. Above pictograms apply to acrylic fabrics.

Composition: Acrylic 100 %, solution dyed Acryl 100%, spinndüsengefärbt Acrylique 100 % teint masse
Finishing: Teflon - Cleangard
Weight (g/m ²): ≈ 330
Width: 120 cm
Colour fastness: 7-8/8
Oil repellency: Note: 4-5
Water repellency: ≈ 800 mm Waterproof
Tensile strength (daN/5cm) Warp/Weft: 150 daN/ 95 daN
Tear resistance (daN) Warp/Weft: 3,5 daN / 3 daN

Waterproof acrylic fabrics are characterized by increased resistance to leaking - more than 800 mm water column. Weave structure together with modern impregnation technology provides high air permeability even on hot days. Oeko-Tex® guarantees that offered acrylic fabrics, subjected to special impregnation for water resistance, are not toxic.

Composition: Polyester AT 110 Dtx
Finishing: PVC
Weight (g/m ²): ≈ 580
Thickness [mm]: 0,47
Colour fastness: 6-8/8
Tensile strength (daN/5cm) Warp/Weft: 270 daN/ 230daN
Tear resistance (daN) Warp/Weft: 30 daN / 25 daN
Temperature resistance: -30 + 70 °

Polyester fabrics coated with PVC are characterized by high resistance to weather conditions. Advantages of these fabrics is the ease to maintain clean and the ease to use. Quality of the components used in manufacture of fabrics provides high color fastness.
